

Step 1 — Browser Setup

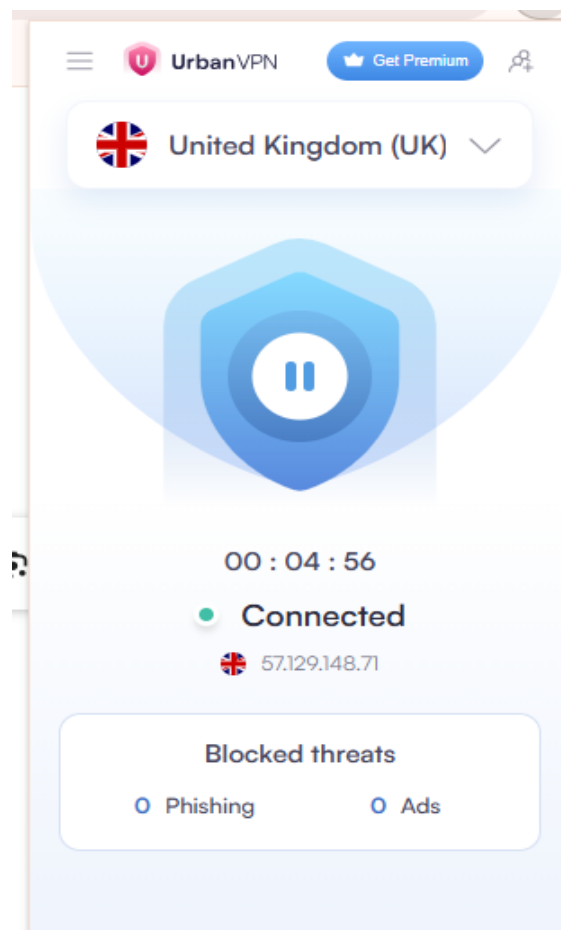

1. Open a **new Incognito window** in Google Chrome.
2. Turn on the **VPN** and select **United Kingdom (UK)** as the location.
3. Use this Chrome extension if required: [Urban Adblocker – Chrome Web Store](#)
4. Open eBay UK and start the keyword research.

Purpose:

Using Incognito mode and a UK VPN helps create a cleaner, UK-focused search environment and reduces the influence of existing browser sessions, cookies, and personalised search activity.

Expected Result:

Keyword research should better reflect the **UK eBay marketplace and UK buyer search behaviour**.

Enable VPN, region set to United Kingdom (UK)

Step 2 — Open eBay and Search the Product

Process

Open **eBay UK** and search using the **Product Sub-Type + “LED”** as the target keyword.

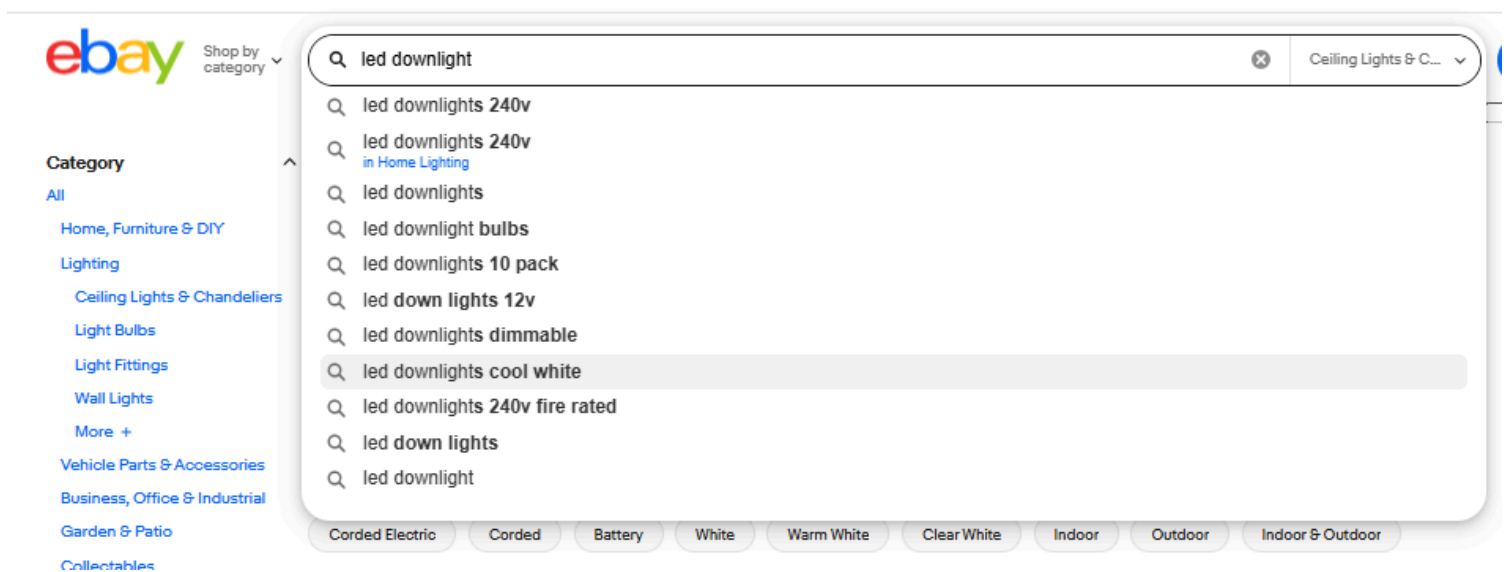

Example:

LED Downlight

Why?

Searching with **Product Sub-Type + LED** helps identify **relevant and directly competing listings** for the same type of product.

This provides more accurate results than using **broad, vague, or branded keywords**, which may return unrelated products.

Search for the target keyword, e.g. "Led DownLight"

Step 3 — Apply Filters

Process

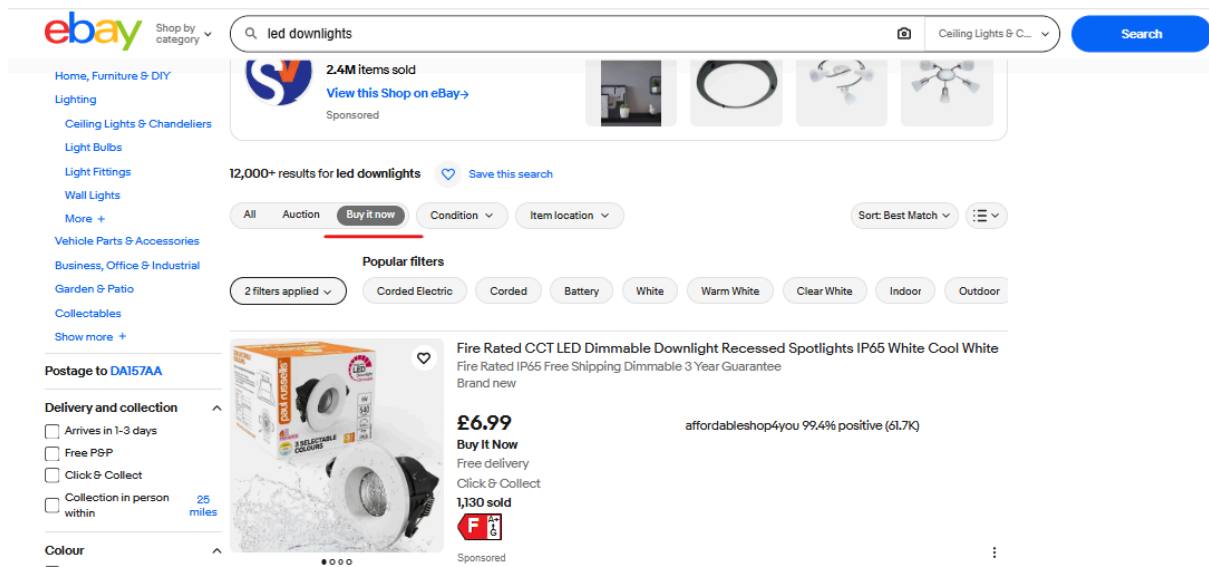

After searching for “**LED Downlight**”, apply the following eBay filters:

- **Buying Format:** Buy It Now
- **Condition:** New

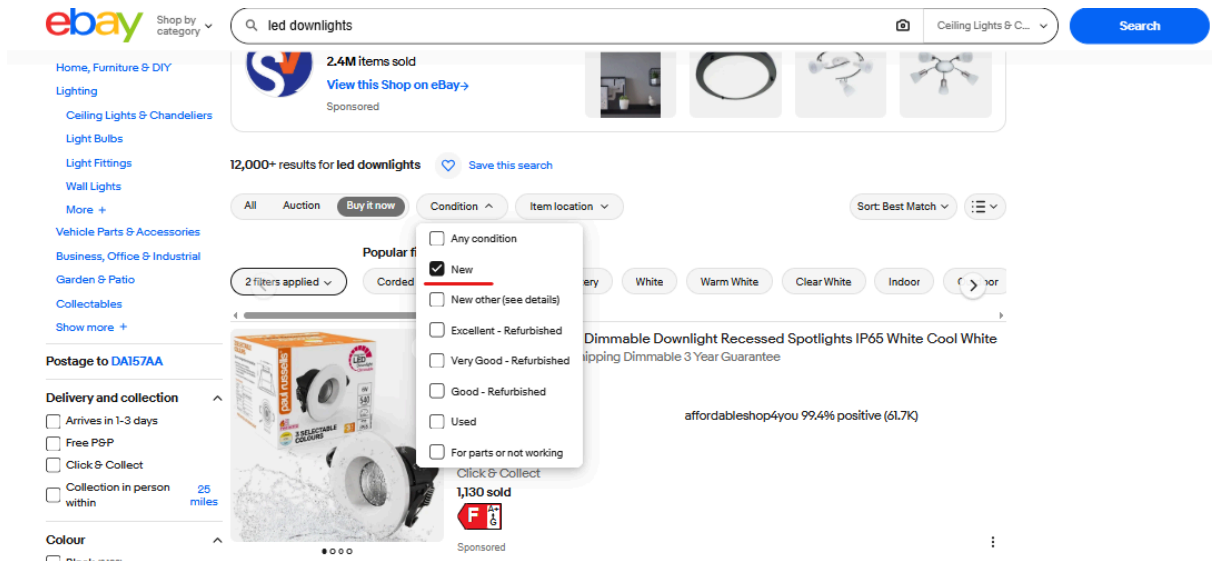

Why?

We sell **new, Buy It Now products**, so applying the same filters ensures that we analyse **relevant competitor listings under similar selling conditions**.

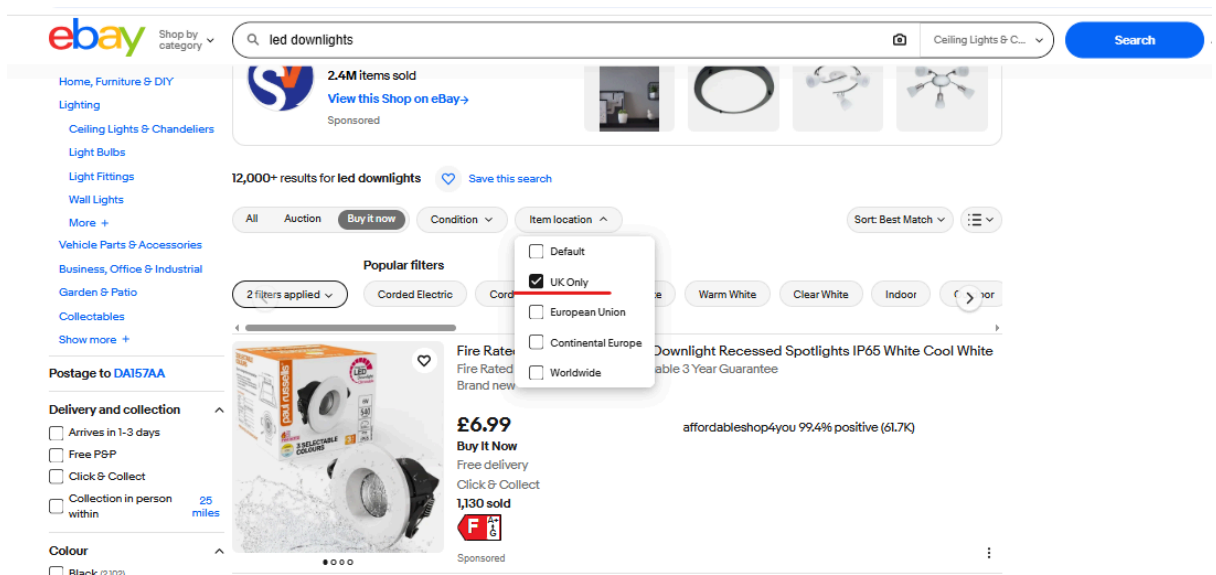

This helps avoid results from **used products or auction listings** that are not directly comparable to our products.

Apply "Buy It Now" filters

Apply Condition as New

Then filter Item Location to UK Only.

Step 4 — Exclude Internal Accounts

Process

When reviewing competitor listings, **exclude the following company-owned eBay accounts**:

- Ledsone
- Electricalsone
- sunsone

Do not include listings from these accounts in the competitor analysis.

Why?

These are **our own internal eBay accounts, not external competitors**. Excluding them ensures that the competitor analysis is based only on **genuine external competitor listings**.

Step 5 — Screen and Shortlist Competitors

Process

1. Compare our product with competitor listings and look for an **exact product match**.
2. Review the **first 3 pages** of eBay search results.
3. If no exact match is found, select products with **small differences** (e.g., colour, size, style, or features).
4. If similar products are also unavailable, select competitors from the **same product category**.
5. Shortlist **6 to 8 competitor listings** for keyword analysis.

Why?

The first 3 pages contain the listings that buyers are most likely to see, making the analysis more relevant to actual search visibility.

Using similar products or the same category ensures that keyword research can still be completed when direct competitors are limited.

Selecting 6 to 8 competitors provides enough data to identify reliable keyword patterns without reviewing too many listings.

Step 6 — Check Sales History

Process

For each shortlisted competitor:

1. Open the competitor listing.
2. Check the **sales history and sales from the last 30 days**.
3. Copy the **Listing ID** from the item URL.
4. Record the competitor's **30-day sales performance**.

Why?

Sales history helps identify **competitors with proven sales performance**, not just competitors that rank highly in search results.

This allows us to prioritise the **titles and keywords used by high-selling competitors**, giving greater focus to keyword patterns linked to products with actual sales performance.

Copy the Listing ID from the competitor's item URL

Step 7 — Finalise the Competitor List

Process

From the shortlisted **6–8 LED Downlight competitors**, select the final **3–5 competitors** based on:

- **Product match** — same or very similar LED Downlight
- **Product relevance** — suitable for the same customer requirement
- **Sales activity** — strong recent sales performance
- **Keyword relevance** — relevant LED Downlight keywords
- **Title similarity** — similar product terminology and search terms

Prioritise competitors with a **strong product match and proven sales activity**.

Why?

Selecting the **top 3–5 relevant and active LED Downlight competitors** keeps the keyword analysis focused on products that are both **closely matched and commercially active**.

This avoids including weaker, unrelated, or low-performing listings in the final analysis.

Step 8 — Keyword Extraction

For each of the final **3–5 LED Downlight competitors**, analyse their listing titles and identify:

- Repeated product keywords
- LED-related keywords
- Product-type keywords
- Installation keywords
- Feature keywords
- Colour/light keywords
- Specification keywords
- Relevant keyword phrases

Process

1. Compare the titles of the final **3–5 LED Downlight competitors**.
2. Highlight keywords and phrases that appear across multiple relevant titles.
3. Record the repeated and highly relevant keywords.
4. Identify important product attributes such as **wattage, colour temperature, beam angle, fitting type, and application**, where applicable.
5. Separate the keywords into **Long-Tail Keywords** and **Short-Tail Keywords**.
6. Validate the selected keywords against the actual product specifications and eBay search behaviour.

Example

Competitor Title 1:

7W LED Recessed Downlight Ceiling Spot Light Cool White

Competitor Title 2:

LED Recessed Downlight 7W Cool White Ceiling Spotlight

Potential Repeated Keywords:

- LED
- Recessed
- Downlight
- Ceiling
- Light
- 7W
- Cool White

These repeated terms can then be reviewed for **relevance and keyword priority**.

Keyword Classification

Long-Tail Keywords

Specific keyword phrases containing **3 or more words**.

Examples:

LED Recessed Downlight

The screenshot shows an Amazon product listing for 'LED Recessed Downlights Dimmable Spot 3CCT Ultra Slim Flat Panel Ceiling Lights'. The main image displays six circular downlights in white and black finishes. A red banner at the top left indicates 'UP TO 15% OFF WITH MULTI-BUY'. Below the main image, there are smaller images showing the lights installed in a ceiling. The product title is 'LED Recessed Downlights Dimmable Spot 3CCT Ultra Slim Flat Panel Ceiling Lights'. The price is £4.99 each. The listing includes a 'Multi-buy' section with options for buying 1, 2, 3, or 4 or more units at different prices. The 'Watts & Finish' and 'Pack' dropdown menus are set to 'Select'. The 'Quantity' is set to 1. The 'Condition' is set to 'New'. The seller is 'alusso-light (65238) Business' with a '100% positive' rating. The listing also includes a 'Message' button and a '381' heart icon.

Why Use Both?

Long-tail keywords provide more specific targeting and can better describe the exact product and customer requirement.

Short-tail keywords provide broader coverage and help identify the core search terms associated with LED Downlights.

Using both creates a balanced keyword set covering **specific product searches and broader search terms**.

Expected Result

Create a validated **LED Downlight keyword list** containing:

- **Primary Keywords**
- **Secondary Keywords**
- **Short-Tail Keywords**
- **Long-Tail Keywords**
- **Competitor Keywords**
- **Keyword Opportunities**
